# A QUICK LOOK AROUND YOUR DEVICE

# GETTING STARTED

## INSERT YOUR SIM CARD

1. Open the back cover using the thumb notch in the bottom left corner:

2. Insert your SIM card carefully into the SIM slot as shown:  
This handset accepts the Standard sized (2FF) SIM card. Do not use micro-SIM or SIM card adaptors which can damage your device.

3. Expand the device memory with a microSD(HC) up to 32GB (optional):

4. The battery will only fit one way, just check the gold pads on the battery line up with the gold springs in the phone.

5. Replace the battery cover and press to click into place.

## SWITCH YOUR DEVICE ON OR OFF, CHARGE YOUR BATTERY

- Press and hold the Power Key to turn on your phone.
- To turn it off, press and hold the Power Key to open the options menu.

## CHARGE THE BATTERY

- Check the correct orientation of the lead, then insert the charger lead carefully.
- Do not force the connector into the charger jack.
- Connect the charger to a standard AC wall outlet.
- Disconnect the charger when the battery is fully charged.
- If the phone is on, you'll see the charging icon  on the status bar.
- If the battery is low, there will be a pop-up message on the screen. As you charge your phone, the lock screen will tell you the battery level each time you wake up your phone.
- On first use please charge the battery for 3-4 hours. It is better to keep your battery topped up than to let it fully discharge.

### **Important Notes:**

- Only use the AC charger and USB lead supplied.
- Insert the charger lead carefully.
- Check the plug and socket are aligned correctly.
- Do NOT use excessive force which may damage the USB port.
- Be careful to avoid tripping on the lead whilst it is plugged in.
- Physical damage to the USB port is NOT covered by warranty.
- Normal charge time is 3-4 hours.
- Do not leave on charge for more than 24hrs.
- To maximise battery life limit multimedia functions.
- Charge the battery between 0°C~45°C. Charge the battery promptly when flat.
- With poor network conditions (less than 2 bars) battery life is reduced.
- When not using the phone for long periods remove the battery.

## TIPS TO MAXIMISE BATTERY LIFE

- After 2-3 charge / discharge cycles the battery life will improve.
- Use regular top up charging rather than letting the battery fully discharge.
- Always charge promptly when flat.
- To avoid the battery entering a deep discharged state charge the battery promptly when flat.
- If the battery is deeply discharged it can take 30 minutes to start charging. Leave it on charge to recover the battery.
- Keep your handset and battery cool. High temperatures degrade the battery more quickly.
- Normal charge time is 3-4 hours. Do not charge more than 24hrs.
- When not using the phone for long periods charge to approx 40% and remove the battery.
- With low network signal conditions battery life is reduced.
- Turn off Bluetooth and Wi-Fi when not in use, and set the screen brightness to automatic to maximise battery life.

**GOOGLE ACTIVATION WIZARD: CREATE OR LOG IN TO A GOOGLE ACCOUNT**  
We recommend you log in or create a Google account to enable on line services.

Follow the on screen wizard to create or log in to an existing Google account.

### **TIPS**

If you set a lock code on your device and then forget the pattern or PIN number it can be reset using your Google Account.

If you have not set a Google account then you need to do a factory reset. From the lock screen condition, press the Emergency Call button, then enter \*983\*987# into the dialler. Follow the prompts to reset your phone.

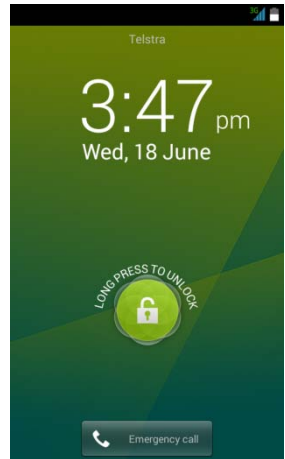

## WAKE UP FROM SLEEP MODE

## SET A SCREEN UNLOCK PATTERN, PIN, OR PASSWORD

Protect your phone from unauthorised use by creating a personal unlock pattern, Voice Unlock, PIN, or password. Use a pattern, PIN or password you can easily remember. Adding a Voice Command can unlock the phone and launch a particular application such as Messaging, Phone or Camera.

- Tap Home > Options > System settings > Security > Screen lock
- Choose from Long press, Voice Unlock, Pattern, PIN or Password.
- Example for Pattern:
- Watch the demo and tap Next
- Draw a pattern of your choice, tap Continue
- Draw the pattern again and tap Confirm.
- We recommend you register a Google account before setting your unlock pattern, PIN or Password. After five incorrect entries press Forgot Pattern to enter your Google account password to reset the screen lock.

## UNLOCK THE SCREEN WITH A PATTERN

- Press Power Key.
- Draw your pattern to unlock the screen. If you make a mistake you can try again up to five times.

If you forget the unlock pattern then after five attempts you can enter your Google account details to unlock your device.

## SET A SIM CARD PIN LOCK

- Set a PIN code on your SIM card to prevent others from using your account.
- The initial PIN code is provided by your service operator.
- Tap Options > System settings > Security > Set up SIM card lock.
- Select Lock SIM card. Enter the PIN and tap OK.

## CHANGE SIM PIN

Before changing the SIM PIN, you need to enable it.

# UPDATING YOUR DEVICE

Your phone can download and install Software updates.

Apps > System updates

The software update service checks an online server to see if any updates are available for your phone. If an update is available you can choose whether to download and install the update.

Downloading via Wi-Fi is highly recommended. Data usage charges will apply if downloading via mobile networks. International roaming data charges will apply for customers downloading the upgrade on a mobile network whilst travelling outside of Australia.

A firmware update will require a restart of your device.

How do I change the Ringtone?	Menu > Settings > Sound > Phone Ringtone
The battery discharges quickly	Possible network coverage issue. Check the signal level. With only 1 or 2 bars, the battery has to work harder to maintain network contact. Limit multi-media to save power. The battery may be worn out.
The handset switches on by itself.	An alarm or calendar event switches the handset on automatically.
No incoming ring or alarm tone	Hold the power key to check the phone is not in silent mode. Check the ringtone and ring volume settings.

<b>Symptom</b>	<b>Solution</b>
I cannot charge the phone	Confirm the charger is properly inserted. Remove the battery, clean the contacts and check it is inserted correctly. The battery may be worn out. Tip: Charge the phone using the supplied USB cable.
The handset switches off after charging.	The handset is charging in the off state. Press and hold the Red key to switch the handset ON.
I cannot connect to other Bluetooth devices	Turn Bluetooth on. Set visibility to Show. Make sure the pass-code is correct. Possible compatibility issues. Not all functionality is supported between different Bluetooth devices and standards.

# SAFETY

## GENERAL STATEMENT ON RF ENERGY

The phone is a low-power radio transmitter and receiver. When switched on it intermittently transmits radio frequency (RF) energy (radio waves). The transmit power level is optimised for best performance and automatically reduces when there is good quality reception. Maximum power is only used at the edge of network coverage so under most circumstances the power output is very low. Under poor network conditions the phone transmits at a higher power, may get hot and have a shorter battery life.

## SPECIFIC ABSORPTION RATE (SAR)

The phone is designed not to exceed the limits for exposure to radio waves recommended by the ICNIRP. The limits include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines measure the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2W/Kg. This device has been tested and approved to be lower than the maximum allowed SAR value and the result is published on <http://www.zte.com.au/telstra/T815.htm>
