Introduction

Alcatel would like to thank you for purchasing this mobile.

Your handset boasts a wide qualitative 4096 colours screen in a stylish compact design, complete with a very helpful, intuitive user interface.

Say it with colours

Your phone includes the Multimedia Message Service enabling you to send colour pictures and sounds in your text messages. You can create expressive messages to match your mood thanks to the embedded and downloaded multimedia content.

A style of your very own

You can also personalise your handset giving it a personal touch. Either choose the colour and texture of your interface from the embedded skins, or pick your wallpapers and melodies from the rich multimedia content. Or, in just one click, select your look from the embedded styles.

You may also modify pictures and sounds to your heart's content.

Your game companion

Get ready for a new intense gaming experience with a large choice of downloadable games with an exclusive handling just like a games console.

Your camera (One Touch 735 only)

Capture and share your favourite moments thanks to the embedded camera. You can zoom, record sound while taking your photos or add funny frames and stamps: it is easy and a lot of fun!
Safety and Use

We recommend that you read this chapter carefully before using your phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained in this manual.

**TRAFFIC SAFETY:**
Given recent studies, which show that using a mobile phone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their mobile when the vehicle is not parked.

When switched on, your phone emits electromagnetic waves that can interfere with the vehicle’s electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:
- do not place your phone on top of the dashboard or within an airbag deployment area.
- connect your phone to an external antenna or switch your phone off. The antenna must be mounted and located away from passengers or separated from them by a metal screen (e.g. car roof).
- check with your dealer or car manufacturer to make sure that the car electronics is well insulated.

**CONDITIONS OF USE:**
Switch off the phone before boarding an aircraft to avoid prosecution.
Switch off the phone when you are in health care facilities, except in designated areas. As with other types of equipment now in regular use, mobile phones can interfere with the operation of other electronic, electronic or radio frequency devices in their vicinity.

When the telephone is on, it should not be placed in a part of the clothing close to a medical device (i.e. cardiac pacemaker, hearing aid, insulin pump, etc.). When making or receiving a call, make sure you place the phone against the ear that is furthest away from the pacemaker or the hearing aid (if there is only one).

Switch the phone off when you are near gas or flammable liquids. Strictly obey the rules relating to the use of mobile phones at fuel depots, petrol stations, chemical plants or in any potentially explosive atmosphere.
Do not allow children to use your mobile phone without supervision.
Do not open or attempt to repair your mobile phone yourself.

Only use your telephone with Alcatel batteries, chargers and accessories compatible with your model (see page 89). The manufacturer disclaims any liability for damage caused by the use of other chargers or batteries. Do not allow your phone to be exposed to adverse weather or environmental conditions (dampness, rain, infiltration, dust, sea air, etc.). The minimum and maximum temperatures recommended by the manufacturer are between -10°C and +55°C. Beyond 55°C, the legibility of the display may be impaired, but this is temporary and not serious.

**BATTERY:**
Before removing the battery from your phone, please make sure that the phone is switched off. Observe the following precautions for battery use: do not attempt to open the battery (due to the risk of toxic fumes and burns), do not puncture, disassemble or cause a short-circuit, do not burn batteries or dispose of them in household rubbish, and do not expose to temperatures in excess of 60°C. Batteries must be disposed of in accordance with locally applicable environmental regulations. Only use the battery for the purpose for which it was designed. Never use damaged batteries.

**CHARGERS**
Mains powered chargers will operate within the temperature range: 0° to 40°.
The chargers designed for your mobile phone meet with the standard for safety of information technology equipment and office equipment use. They should be used for this purpose only.

**RADIO WAVES:**
Proof of compliance with international standards (ICNIRP) or with European Directive 1999/5/EC (R&TTE) is required of all mobile phone models before they can be put on the market. The protection of the health and safety for the user and any other person is an essential requirement of these standards or the directives. This mobile phone complies with international and European requirements regarding exposure to radio waves.
Your mobile phone is a radio transmitter and receiver. It was designed and manufactured to comply with the radiofrequency (RF) exposure guidelines established by the Council of the European Union (Recommendation 1999/519/EC) (1) and by the Council of the European Union (Recommendation 1999/519/EC) (2). These limits are part of a set of requirements and establish authorized radiofrequency levels for the public. These limits were established by groups of independent experts on the basis of regular and detailed scientific assessments. They include a significant safety margin intended to ensure the safety of all, regardless of age or state of health.

(1) The ICNIRP requirements are applicable in the following regions: Central America (except Mexico), South and North Africa, Pacific Asia (except Taiwan, Korea and Australia).
(2) The European recommendation (1999/519/EC) is applicable in the following regions: Europe, Eastern Europe, Israel.

Get user manuals: See SafeManuals.com
General Information ................................................

- Internet address: www.alcatel.com - Wap address: wap.alcatel.com
- Alcatel Hot Line Number: see the “Alcatel Services” leaflet (calls charged at applicable local rates in your country)

Your telephone is a transceiver that operates on GSM networks with 900 MHz and 1800 MHz bands. The marking indicates that your telephone complies with “1999/5/EC (R&TTE)” directive and that the accessories concerned comply with current EC directives. The entire copy of the Declaration of Conformity for your telephone can be obtained through Alcatel website: www.alcatel.com.

Protection against theft

Your mobile phone has an identification number called IMEI (phone serial number) shown on the packaging label and in the product’s memory. We recommend that you note this number the first time you use your telephone by entering *#06# and keep it safe. It may be requested by the police or your operator if your telephone is stolen. This number allows your mobile telephone to be blocked, preventing a third person from using it, even with a different SIM card.

The World Health Organisation considers that present scientific information does not indicate the need for any special precautions for use of mobile phones. If individuals are concerned, they might choose to limit their own or their children’s RF exposure by limiting the length of calls, or by using “hands-free” devices to keep mobile phones away from the head and body.” (fact sheet n° 193). Additional information about electromagnetic fields and public health are available on the following site: http://www.who.int/phe/emf
1.1 Keys

- **Games access/action key**: Games access (1)
- **Services**: Services (1)
- **Personal key**: Personal key (1)
- **Left soft key**: Confirm the option displayed above
- **Right soft key**: Confirm the option displayed above
- **Access to camera**: Access to camera (2)
- **Switch on/Switch off the telephone**: Return to the main screen (long keypress)
- **Delete**: Delete (short keypress)
- **Return to the previous screen**: Return to the previous screen (short keypress)
- **Go to MENU**: Go to the main menu
- **Confirm an option**: Confirm an option

**Scroll key or navigation key**:
- **Adjust the volume during a call**: Scroll to select an option
- **Scroll to select an option**: Go to directory (keypress downwards), go to messages (keypress upwards)
- **Pick up / Hang up**: Pick up/hang up (short keypress)
- **Access call memory (Redial)**: Access call memory (Redial) (short keypress)
- **Use voice recognition features**: Use voice recognition features (long keypress)
- **Consult your voice mail**: Consult your voice mail (long keypress)
- **Activate/deactivate the vibrator**: Activate/deactivate the vibrator (long keypress)
- **Keypad lock/unlock**: Keypad lock/unlock
- **In edit mode**: Go to the symbols table:
  - Short keypress: upper case, lower case, digits
  - Long keypress: switch from normal to predictive mode

The navigation function works best when the scroll key is not forced.
1.2 Main screen icons

- Battery charge level
- vibrator mode: your phone vibrates but neither rings nor beeps (see page 42).
- Silence mode: your phone neither rings, beeps nor vibrates except for the alarms (see page 42).
- Events (consult information): you can consult your voice mail, view unanswered calls, unread messages, WAP alerts.
- Message list is full (SMS): your terminal cannot accept any more new SMS. You must access the message list and delete at least one message (see pages 30-31).
- Call forwarding activated: your calls are forwarded (see page 48).
- Timer or alarm clock programmed (see page 59).
- Signal strength indicator.
- Preferred tariff areas.

- Keypad locked.
- Roaming within your country of subscription.
- Infrared: infrared link activated.
- Link via Alcatel USB Data cable
- Double line: indicates the selected line.
- GPRS: network available.
- Download in progress/immediate reception of an incoming MMS.
- Sending an MMS.

* The icons and illustrations in this guide are provided for informational purposes only.
* Contact your network operator to check service availability.
* Contact your network operator to check service availability.
2 Getting started ..............................................

2.1 Set-up

Inserting and removing the SIM card

You must insert your SIM card in order to use your phone.

Place the SIM card with the chip facing downwards and slide it into its housing. Make sure that it is correctly inserted.

Installing and removing the battery

Insert and engage the battery, then close the telephone cover.

Unclip the battery and remove it.

Charging the battery

- A short beep will sound when charging begins.
- The animation may take several minutes to start and may emit a slight whistling sound if the battery is flat.
- Be careful not to force the plug into the socket.
- The battery icon will take 2 minutes to indicate the correct charge level.
- Make sure the battery is correctly inserted before connecting the charger.
- The mains socket must be near to the phone and easily accessible (avoid electric extension cables).

When using your phone for the first time, charge your battery up completely (approximately 3 hours). Only use ALCATEL chargers.

Precautions during use

Do not place your hand on the upper part of the mobile phone.

Your telephone is equipped with a built-in antenna. For optimal operation, you should avoid touching it or degrading it.

For better radio reception and optimum operation, do not touch the upper part of your telephone.

---

(1) Check with your network operator to make sure that your SIM card is 3V compatible. The old 5 Volt cards can no longer be used. Please contact your operator.
3 Calls ........................................................................

3.1 Making a call
Dial the desired number then press the key to place the call. To hang up, press the same key again. If you make a mistake, you can delete the incorrect digits by pressing the key.

To enter characters “+” or “P” (pause), make a long keypress on the key (the following characters will scroll by: 0, +, P, •).

Making an emergency call
If your phone is covered by the network, dial 112 and press the key to make an emergency call (or any other number provided by your operator). This works even without a SIM card and without typing the PIN code or unlocking the keypad.

Making a call with a prefix
Access “Prefix” by making a long keypress on and stop when you see the “+” sign. To access the various prefixes, use the key:

• To make an international call, press and when you have confirmed the country and area codes, finish dialling the number and send the call.
• If you already know the prefix you want, you can go directly to the icon and enter the prefix directly followed by the number of the person you are calling.

In some companies, telephone numbers all begin with the same digits. By using the “Prefix” feature, you can memorise the shared digits but you will need to enter the variable part. You must create the prefixes yourself.

2.2 Switching on your telephone
Make a long keypress on the key until the telephone comes on, type in your PIN code if necessary and then confirm with the key. The main screen is displayed.

If you don’t know your PIN code or if you have forgotten it, contact your network operator. Do not leave your PIN code near your telephone and store your card in a safe place when not in use.

If call broadcast messages are displayed, use the key to browse through them in full or press the key to return to the main screen.

While the phone is searching for a network, the symbol is displayed (???? is displayed if your SIM card is rejected by the network, in this case please contact your operator).

2.3 Switching off your telephone
Press the key from the main screen (long keypress).
3.1 Automatic redial
If this feature is activated and supported by the network (see page 50), the person you called will be called back automatically if you are unable to reach him/her.

3.2 Calling your voice mail
Your voice mail is provided by your network so that you don’t miss any calls: it works like an answering machine that you can consult at any time. To access your voice mail, make a long keypress on the key, then send the call using the key.
If the access number for your operator’s voice mail service does not appear, dial the number that you were given. To change this number at a later date, refer to “My numbers” (see page 47).
To use your voice mail service from abroad, contact your network operator before leaving.

3.3 Receiving a call
When you receive an incoming call, press the key to talk and then hang up using the same key.
When you have an incoming call, your telephone rings quietly at first and then gets louder. If the icon is displayed, the vibrator is activated: no ringtone. If the icon is displayed, the phone neither rings nor vibrates.
The caller’s number is displayed if it is transmitted by the network (contact your network operator to check service availability).

Muting the ringtone
Press C or use the navigation key to scroll to the left icon while the telephone is ringing: answer the call pressing the key.

Rejecting a call
Press the key twice or scroll to the icon to refuse the call indefinitely.

3.4 During the call
Available functions
During a call, you can use your directory, your diary, short messages, etc. without losing your correspondent by pressing the key.

Call on hold
Ongoing call
Hands-free
WARNING: move the handset away from your ear while using the “hands-free” option because the amplified volume might cause hearing damage.

Directory
Messages
Diary
Services
Voice memo (record your current call).
Display notes

Adjusting the volume
You can adjust the sound level during a call using the navigation key.

In handsfree mode, the speaker on the back of the phone is automatically activated. This speaker has a Hi-Fi membrane.

Contact your network operator to check service availability.
Handling two calls

- **Call waiting**
  If a second call comes in while you are already on line, you will be notified by a tone. You can then accept the call by pressing the `key.
  Your current call will be automatically put on hold. You can then switch between your two correspondents using the `key and then `key.

- **Making a second call**
  To call a second party during a call, press the `key and select “Dial”.

3.5 Conference calls

Your phone allows you to talk with several people at the same time (up to 5). You are on a double call: press `key, select “Conference” then confirm with the `key. If a third call comes in, answer it by pressing the `key and speak with your new correspondent.

This correspondent becomes a member of the conference if you press `key, select “Add conf.”, and then confirm by pressing `key. Pressing `key disconnects the current call.

To end the conference call, press `key and select “End conf.”.

3.6 Double line

Your SIM card can contain two distinct telephone numbers. Under “Tools”, choose “Double line” and then select a default line: all your outgoing calls will be made from this number. Incoming calls, however, will continue to use the two lines (see page 54).

---

4. Call memory

4.1 Consulting the call memory and calling back

You can access your call memory by pressing the `key from the main screen. You must first choose the appropriate icon:

- Outgoing calls (Redial)
- Unanswered calls
- Answered calls

The icons that may be displayed to the left of the person’s name show the type of telephone number recorded in the directory (Home, Office, Mobile Phone).

4.2 Available options

From the stored number, you can access the following options using the `key:

- **View**
  - Consult call details (number, date, time, etc.)

- **To directory**
  - Store the selected number in one of your directories.

- **Delete number**
  - Delete the selected number.

- **Clear list**
  - Clear the entire list.

- **Back**
  - Return to the list of numbers.

- **Exit**
  - Return to the main screen.

---

(1) Contact your network operator to check service availability.

6 Directory

6.1 Consulting your directory

To access the directory from the main screen, press the bottom of the  key or press the OK key and select the icon from the menu.

You have 4 directories:

SIM directory:
The SIM card’s capacity depends on your operator. It is not possible to assign more than one number to a name.

General directory:
Contains all files created. The SIM card files are not created automatically in the general directory, but they can be copied to it.

Personal directory:
You can store your personal contacts in this directory (relatives, friends, etc.).

Professional directory:
You can store your professional contacts in this directory (companies, etc.).

In addition to the directories already provided, you can create your own directories (see page 26).

Searching for a name by its first letter

You can search for the person’s name by pressing the key associated with the first letter of his/her name.

For some languages that have a specific entry mode, you should use the “Search name” option.

Read a file

Select a name from your directory and confirm with the OK key. Select “View” and confirm.

Making the call

Press the key when the name is selected. If several numbers are associated with the name to be called, you must first choose the number from the list (Home, Mobile, Office, etc.) using the key. Press the key to make the call.

Information in the directory and the diary may be sent to and received from a computer using the Alcatel PC software package (see page 84).

6.2 Creating a file

Select the directory in which you wish to create a file. From the list of names in your directory, press the OK key, select “Create file”, then OK.

You can save the data you have entered at any time by pressing the OK key and choosing “Save & Quit”. You can go to the following field by selecting “Continue” or by using the navigation key.
When you create a new contact in the product directory, at least one of the following fields must be filled in: Identity card, Numbers, E-mail, Address, Notes, Person Info 1...4.

If you use your phone abroad, store the numbers in your directories in international format “+” (see page 16).

6.3 Available options

From the list of names in your directories, you can access the following options via the OK key:

- **View**
  - View a complete file: name, address, e-mail, etc.
- **Create file**
  - Create a file (name, numbers, address, e-mail, etc.) in the desired directory.
- **Write Message**
  - Send an SMS or MMS to a contact from the directory.
- **Modify**
  - Modify the contents of a file.
- **Assign image**
  - Select a photo/image/animation in the album and assign it to a file (not valid for the SIM directory).
- **Delete**
  - Delete the selected file.
- **Classify file**
  - Move a file from one directory to another.
- **Dir. melody**
  - Assign a melody to a directory.
- **Create dir.**
  - Create your own directory.
- **Empty Dir.**
  - Empty the contents of a directory (created directory only).
- **Delete dir.**
  - This directory and its files will disappear completely.
- **Copy all->SIM/Gen**
  - Copy the whole directory to the SIM or telephone directory in one go if there is sufficient memory.
- **Voice recog.**
  - Record a voice recognition command except in the SIM.
- **Transfer**
  - Exchange data via infrared (see page 62).
- **Back**
  - Return to the list of names in your directory.
- **Exit**
  - Return to the main screen.

6.4 Creating a new directory

From the product directory, press OK and select “Create dir.”, confirm using the OK key, then name your new directory. You can create up to 13 new directories.

You can delete only those directories that you created by selecting “Delete dir."

6.5 Classifying files

From a product directory, press the OK key and select “Classify file”, confirm using the OK key, choose the destination directory, press the OK key and select “Validate”.!

6.6 Using voice recognition

Voice recognition allows you to place your call by pronouncing the party’s name without using your directory.

Recording a voice recognition command

Select a file from the product directory and confirm using the OK key. Then select “Voice recog.” and confirm once again. Three different beeps will signal the start of recording, its failure or its success. After recording, you can “Listen to”, “Replace” or “Delete” a recorded voice recognition command.
7 Messages ..........................................................  
7.1 Accessing messages  
From your telephone, you can read, write, send and receive short messages “Text/SMS” and “Multimedia/MMS” messages and share them with other mobiles (1). Multimedia messages are messages whereby you can send images, photos, animations, sounds and voice messages. You have a function “Vox MMS”. This is a simplified MMS, which allows you to send a voice memo as a message.  

The multimedia message function can only be used if it is authorised by your operator. Only telephones equipped with this function can receive this type of message.  

To access the messages from the main screen, press the top of the key or press the key and select “Messages” with the navigation key and confirm with the key.  
Your “Messages” menu may be compared to a letter box: using the navigation key, choose the icon you want:  

- **Inbox**: View messages received: read/unread/archived.  
- **Outbox**: View sent and unsent messages.  
- **Sending parameters**: Perform your settings.  

(1) Contact your network operator to check service availability.
When viewing your messages, you will find the following status icons, depending on:
- the type of message: SMS messages, MMS messages, MMS notification;
- where your message is stored: messages stored on your SIM card (SMS only), messages stored in the phone's memory (SMS, MMS, MMS notifications).

7.2 Viewing messages

When a new short message arrives, the following message is displayed: "Read your new messages?", a beep sounds (1) and the icon shows up. The icon disappears when you have read all of your new messages.

7.2.1 Viewing short messages "Text/SMS"

If you only have one new message, press OK to read it directly from the main screen. If you have several new messages, you can access a list. Select the appropriate message by scrolling with the navigation key then press OK. Read the whole message scrolling with the navigation key.

When you receive a message, you can decide whether or not to save the pictures, sounds or text for later use.

Available options

While reading an SMS, you can access the following options by pressing OK:

- Delete • Delete the message.
- Reply • Reply to the message.
- Forward • Forward the message.
- Archive • Save from your SIM card to the telephone memory.
- Save picture • Save a picture contained in the message.
- Save animation • Save an animation contained in the message.
- Save melody • Save a melody contained in the message.
- Save canned • Save the message as a predefined message.
- Save number • Save one or more numbers contained in the message.
- Launch WAP • Go to the WAP address contained in the message.
- Back • Return to the contents of the message.
- Exit • Return to the main screen.

(1) To modify or deactivate the audible signal, see page 41.

7.2.2 Viewing "Multimedia/MMS" and "Voice/Vox MMS" messages (2)

You have two ways of managing the reception of MMS: immediate or deferred reception. Confirm your choice from "Sending param." section in the "Messages" menu (see page 39).

- "Immediate reception": when in idle mode, an icon will indicate that a message is being downloaded. Then the message appears: "Read your new messages?". Press OK to go to the message options and select "Open". The contents of this message will be automatically stored in the memory of your telephone. Using the appropriate options you can record images, sounds or texts contained in the messages and use them later.

(2) Contact your network operator to check service availability.
(3) Default option depending on your operator.
7.3 Writing and sending short messages ("Text/SMS")

7.3.1 Writing short messages (SMS)

Go to the "Create message" menu, if necessary, from the "Messages" function. Select "Text/SMS" and press OK. You can modify a predefined message or create a new message.

Pictures, sounds, mood icons

You can customise your messages by adding pictures and sounds or express how you are feeling by using the mood icons proposed in your telephone.

You can also enter your own mood icons using the alphanumeric characters: example ":-)".

By selecting "Preview", you can view the contents of your completed message. The icons, sounds and mood icons appear on your telephone screen.

While reading a message, you can access further options by pressing OK or by pressing the left soft key ("Options").

Manual
- You can stop the automatic scrolling if the message contains several slides.

Restart
- Allows you to view the message again.

Play silent/
- Allows you to view your MMS
Play sound
with or without sound.

Save items
- Save objects received by MMS in your telephone's memory.

Available options when selecting an MMS (2):

Open/Read the selected message.
Retrieve
ForwardSend the MMS to other recipients (the contents of the MMS will not be modifiable).
Delete msgDelete the MMS.
More info.
- Go to MMS details: size, class, priority, mailing list...
Archive
Save num/mailStore the MMS in "Archives".
- Store the number or e-mail address of the sender in your directory.
Reply
- Reply by SMS, MMS or by Vox MMS.
Reply all
- Reply to all MMS recipients.

Previous slide
- Takes you to the previous page.

Press OK to read the new message

Manual
- You can stop the automatic scrolling if the message contains several slides.

Previous slide
- Takes you to the previous page.

Press OK to read the new message

Deferred reception (1): You will receive a notification with the name and number of the sender and the title of the message if it has been saved. You can download the contents of an MMS at any time in order to read it; you can also delete it without reading it; in this case the sender of the MMS will be informed that it has been rejected.

(1) Default option depending on your operator.

(2) Options available according to the reception mode chosen.
7.3.2 Sending an SMS

You can send a message manually by entering the number of the recipient.
- To a person stored in one of your directories.
- To several different people by specifying a distribution list (choose the "Distribution list" option).
- To a group of people that you have pre-set.
- To an e-mail address that can be entered or copied directly from your directory (1).

If the "Ack. receipt" feature is activated in "Parameters", when you consult your sent messages, the following symbols will indicate:

- **✓** Msg.ack: message sent and acknowledgment received
- **✗** Msg.not received: message sent and waiting for acknowledgement of receipt or message not received. You should send the message again.

7.4 Writing and sending multimedia messages ("Multimedia/MMS")

7.4.1 Writing a multimedia message (MMS)

Go to the "Create message" menu, if necessary, from the "Messages" function. Select "Multimedia/MMS" and press **on**.

---

(1) Depending on your operator.
This message may contain several pages. It must not use up more than 50 KB of memory. As you create your MMS, you will be informed of the memory used (for all pages).

Each page may only contain a single item of each type. If you wish to add an object, you will have to create a new page. For example: to send 3 images in the same MMS, you will have to create 3 pages.

Select one of the following options with the OK key to create your MMS as you go along.

Add image • Add a picture or an animation from the “Album” function (see page 69).
Add text • Add text, a telephone number or an e-mail address from your directory.
Add sound • Add a sound from the “Album” function or a voice message.
Add page • Add a page to your MMS.
Back • Return to the previous screen.
Exit • Return to the main screen.

While creating your MMS, you can switch between the pages using the key.

You will be able to modify or delete an item or page, save your message in order to come back to it later.

7.4.2 Send an MMS

You can send an MMS to a person by dialling the number or via the directory. You can also send one to a group of people (see page 40) or to an e-mail address.

You can reply to an MMS, either by MMS, SMS or Vox MMS.

To send text only, it is advisable to use an SMS.

Should the sending fail, the mobile will resend it automatically (1). The icon will appear at the bottom of your screen each time an automatic attempt is made to send the message.

In your “Unsent” messages box, the icon will indicate that the automatic sending procedure is activated.

Should the message fail completely, you will be notified by a message. In your “Unsent” messages box, the icon will indicate that the MMS could not be sent. By selecting it and pressing OK, you can send it again, modify it or delete it.

(1) Contact your network operator to check service availability.

Get user manuals: See SafeManuals.com
7.4.3 Creating and sending a voice message ("Voice/Vox MMS")

Go to the "Create message" menu, if necessary, from the "Messages" function and select "Voice/Vox MMS". You can send a message quickly using the "Voice/Vox MMS" function without writing. The recipient is not disturbed and simply receives a normal MMS. You can reply to any message using a "Voice/Vox MMS".

7.5 Data entry system

To facilitate writing messages, your phone is equipped with a predictive text input system. To form a word, simply press the key once for each of the letters in that word. The cursor shape varies depending on the input mode selected:

- In predictive input mode
- In normal mode

To confirm a word and insert a space, push the → key to the right or press the ↓ key downwards or press the key.

The letter displayed may not always correspond to the desired letter; the system suggests the most common word. Do not worry about the words initially suggested; keep on typing, the system will make better suggestions as you continue to input letters.

Specific keys Normal mode / Predictive mode

Normal: Display the table of symbols.
Predictive: View words proposed by the dictionary that include a sign or punctuation mark such as an apostrophe, @, dash, etc.

Depending on the language.

7.6 Message settings

Press OK in the message menu and using the navigation key, select the icon.

7.6.1 Sending param.

You can program the following parameters:

Normal: Insert a “+”, “0” or “•”.
Predictive: View other words in the dictionary.
Short keypress: Move between automatic capitals [ ], upper case [ ], lower case [ ], digits [ ]
Long keypress: Switch between the normal and predictive mode.

Available options

In addition to the available options in the normal entry mode, you will also find the following choices:

Confirm word - Confirm the selected word.
Other words - View other possible words.
Add word - Add a word to your personal dictionary.
Languages - Use the dictionary in another language.
Save - Save the message.

You have a personal dictionary which allows you to add [1], modify or delete words. While writing a message, you can add a word by pressing the OK key and by selecting "Add word".

(1) Depending on the language.

(1) Contact your network operator.
7.6.2 How your messages are saved

By selecting the “Mem.” option in the “Sending param.” menu, you have 3 ways of handling your messages (see page 39):

1. Sent messages:
   - Save the messages in your SIM card (SMS only),
   - Save the message in your telephone’s memory (SMS and MMS),
   - Send your messages without saving them. You will not be able to read them later (applies to SMS, MMS and Vox MMS).

2. Received messages:
   - Short messages (SMS) are always saved in the SIM card memory,
   - Multimedia messages are always saved in the telephone’s memory,
   - You can save your messages (SMS/MMS) in the “Archives” folder of your inbox. All archived messages (SMS or MMS) will be stored systematically in the telephone’s memory.

7.6.3 Creating a group

Select the “Add group” item, confirm using the OK key, then name the group. You can now enter the phone numbers for the members of your new group.

7.6.4 Deleting messages

To delete all messages on your SIM card or in the Archives go to the “Sending param.” menu and select the following options:

- “Delete SIM msg.”: delete all messages received and sent from the SIM.
- “Delete prod. msg.”: delete all messages stored in the Archives.

Your SIM card’s capacity depends on your operator. The icon appears when the card is full.

To receive new messages, delete some messages.

Contact your operator.
8 Customise ................................................

From the main screen, select the icon menu and select the function of your choice in order to customise your telephone.

8.1 Ringtones

Available functions

To modify the sound settings, adjust using the key:

- Select a melody using the key then confirm by pressing OK.
- Adjust the volume using the key.
- Select the type of key beep.
- Select a melody for a new incoming message.
- Select a melody for a new incoming appointment.
- Select a melody for a new incoming alarm.

Mode

<table>
<thead>
<tr>
<th>Mode</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Normal ringtone (increasing volume)</td>
</tr>
<tr>
<td>Discreet</td>
<td>Normal ringtone (increasing volume) preceded by beeps.</td>
</tr>
<tr>
<td>Vibration</td>
<td>Activate the vibrator and mute all sounds (ringtone, message beep, appointment alarm, low battery alert). The icon will be displayed.</td>
</tr>
</tbody>
</table>

Vib. Beep. Melo

Vibrator followed by beeps then the normal ringtone (increasing volume).

Beep + Vibration

Warning beep followed by the vibrator.

Silence

No sound or beep except for alarms. The icon will be displayed.

This mode may be deactivated when using certain accessories (full duplex hands-free car kit...).

8.2 Atmospheres

The “Atmospheres” menu allows you to customise your telephone to suit your own taste. In one go, you can modify 7 customisable items. To access this menu from the main screen, press OK and select the “Customise” item with the navigation key. Press OK once more then choose the “Atmospheres” menu.

An Atmosphere comprises:

- ON screen image/animation
- OFF screen image/animation
- Main screen image/animation
- Skins and colours
By selecting the "Main screen" you can customise it by replacing the default image or animation displayed on your telephone.

8.4 Colours
This function enables you to customise the graphic style and the colours of your telephone (menu screens, entry screens etc.).

To access this function, press from the "Customise" menu then select "Colours" with the navigation key.

8.5 Tone maker
This function allows you to compose or store a melody and use it as the ringtone.

To compose your own melody, select "Compose" then use the keypad as shown below:

8.3 Main screen
The main screen is displayed after your telephone has been switched on and/or when no functions are being used (calls, sending of short messages...).

You can lock and unlock the keypad by making a long keypress on the key.

You can access the directory directly from the main screen by pressing the key, access messages by pressing the key, or the Album by pressing the key to the left or right.

3 sound items:
- 1 melody for incoming calls
- 1 melody when the telephone is switched on
- 1 melody for notification of incoming messages

When using for the first time, a default Atmosphere is activated.

Even if you choose an Atmosphere, you can still modify the elements in it one by one (see pages 44-45).

You can reactivate an Atmosphere at any time.

When changing Atmosphere, an installation screen appears:

Wait for the 7 elements to be installed.

The installation of the Atmosphere can be stopped and cancelled if you receive an incoming call or if you press the key. In this case, the previous choice of Atmosphere is kept.

When using for the first time, a default Atmosphere is activated. Even if you choose an Atmosphere, you can still modify the elements in it one by one (see pages 44-45).

You can reactivate an Atmosphere at any time.

When changing Atmosphere, an installation screen appears:

Wait for the 7 elements to be installed.

The installation of the Atmosphere can be stopped and cancelled if you receive an incoming call or if you press the key. In this case, the previous choice of Atmosphere is kept.

3 sound items:
- 1 melody for incoming calls
- 1 melody when the telephone is switched on
- 1 melody for notification of incoming messages

When using for the first time, a default Atmosphere is activated.

Even if you choose an Atmosphere, you can still modify the elements in it one by one (see pages 44-45).

You can reactivate an Atmosphere at any time.

When changing Atmosphere, an installation screen appears:

Wait for the 7 elements to be installed.

The installation of the Atmosphere can be stopped and cancelled if you receive an incoming call or if you press the key. In this case, the previous choice of Atmosphere is kept.
8.6 ON/OFF screens
You can customise your welcome message, animation, melody or image that appears when you switch on your telephone.
You can also customise your OFF screen with an image or animation.

8.7 Energy saver
You can choose whether to activate this function or not:
- Deactivated: the main screen remains displayed.
- Activated: a new screen appears after a few seconds displaying the following information: clock, battery charge, signal strength.
By default, the economy mode is activated.
We advise you to stay in economy mode to maximise your telephone’s autonomy.

8.8 Zoom (1)
Two character sizes are available for your telephone screen. Large characters is selected by default. If you wish to display more information select “Zoom”.

8.9 Customising the keys (1)
From the main screen you can customise your keys: call somebody directly or access a function.

8.9.1 Personal key (1)
This key has pre-defined functions, which vary from one model to another (operator services, access to games…). The main use for it is as an action key for games (see page 86). You can also assign it with the function of your choice. For example, it can be used as a short cut to access the Diary, to write a message…

8.9.2 Keypad
To programme a key on your keypad, select “Keypad” and choose the key that you wish to programme. Then select “Numbers” if you wish to programme a direct call or “Function” if you wish to assign a specific function to the selected key.

8.10 Voice commands
Voice commands allow you to access one of the menu functions by pronouncing the name of that function.

Recording a voice command
In order to record a voice command for one of the menu functions, select “Voice Command” and the desired function and then follow the instructions.

(1) Depending on the language.
(2) Contact your network operator to check service availability.
The functions for which a voice command has been recorded are indicated by the icon. There are 10 functions accessible through voice recognition.

Using a voice command

You activate "voice commands" by a long keypress on the key from the main screen. To use a voice command, follow the instructions on the screen.

After recording, you can "Listen to", "Replace" or "Delete" a recorded voice recognition command.

8.11 My numbers

My number

Save your telephone number (usually written on your SIM card), type in the number and confirm by pressing or .

Voice mail

Modify the number to access your voice mail.

8.12 Settings

Services

Call forward (1)

Voice Activate/cancel call forwarding to a specified number (type in the number, confirm by pressing ). This option is applied as follows:

• Unconditional Systematic forwarding of all your calls. The icon is displayed.
• Conditional If your line is busy, if you don’t answer or if you are outside the network range.
• If busy Only if your line is busy.
• If no reply Only if you don’t answer.
• If unreachable Only if you are outside the range of the network.

Data Your data reception calls are systematically forwarded to a specified number.

Fax Your fax reception calls are systematically forwarded to a specified number.

Status List of call forwarding options activated on this telephone.

Cancel all Cancellation of all activated call forwarding options.

Call barring

Outgoing calls Activate/deactivate the call barring. This option is applied as follows:

• Except SIM dir.
• All (1) All outgoing calls are barred.
• International (1) Outgoing international calls are barred.
• Except->Home Outgoing international calls except those to your country of subscription are barred.

(1) Contact your network operator to check service availability.
### Search

- **Search**
  - **Available**
    - List of networks available in your radio environment.
  - **Mode**
    - Automatic: The first network searched for is the network you used last.
    - Manual: The choice of the connection network is left up to the user.
  - **Preferred list**
    - List of networks to which you wish to be connected on a priority basis (update this list using ).

### Calls

- **Call waiting (1)**
  - Activate/deactivate the notification of a second incoming call by a beep.
- **Conceal ID (1)**
  - Activate/deactivate the option making your calls anonymous (your number is no longer transmitted by the network to the party you are calling).
- **Caller ID (1)**
  - Activate/deactivate the display of your caller’s number (or name if found in the directory) for each call.
- **Ntw.auto (1)**
  - Enables automatic callback by the network of the last dialled busy number.
- **Auto. redial**
  - Activate/deactivate automatic callback of your party if the first call did not go through.
- **CB list (1)**
  - List of numbers for which automatic callback was not successful (10 unsuccessful attempts).

### Networks

- **SMS CB (1)**
  - Messages broadcast over the network (weather forecast, traffic conditions, etc.) are automatically displayed on the main screen.
  - **CB list**
    - List of codes for messages to be displayed.
  - **Reception**
    - Depending on the option selected, the phone displays messages broadcast over the network.
      - Partial: The phone receives messages intermittently and displays them according to your list (see “CB list” option).
      - Complete: The phone continually receives messages and displays them according to your list (see “CB list” option).
    - No reception: The phone does not receive any messages.

### Status

- **Except FDN dir (1)**
  - Barring of outgoing calls in accordance with a specific “FDN” directory contained in the SIM card.
  - **Activate/ Deactivate**
    - All calls not beginning with one of the numbers recorded in the “FDN” directory are barred.
  - **Change**
    - If the “Except FDN dir” feature has been activated, after entering PIN2, you can update the “FDN” directory (update “FDN” directory by pressing ).

### Exceptions

- **Except SIM dir**
  - All incoming calls are barred.
- **If abroad (1)**
  - Incoming calls are barred when you are abroad.

### Clear list

- **Delete the list.**

</table>

(1) Contact your network operator to check service availability.
Headset
Automatically without any keypress, after approximately 2 ringtones (this option is operational only if your mobile phone is connected to an audio kit, handsfree kit).
Key 1
Only by pressing the 1 key.
Any key
By pressing any key from the keypad (keys 1 to #).

Car kit
Choose the pick up mode and the ringtone mode.

Double line
Your SIM card can contain two distinct telephone numbers. Calls made will be invoiced on the selected line. Incoming calls may however come in on both lines.

Dictionary
You have a dictionary to which you can add your own words in addition to those suggested by the predictive input system. When you consult your dictionary, you can add, modify or erase words by using the options accessed by the OK key.

Input mode (2)
In addition to the character table for Arabic, Cyrillic, Chinese, other data input modes are also available in your telephone. This feature allows you to write short messages and enter names into your directory.

Contact your network operator to check service availability.
(2) Depending on the language.
Your phone has a sophisticated diary that will help you to manage your daily schedule. You can also save “to do” lists.

Consulting your diary

Three views are possible. You must first choose the appropriate icon:

- Daily view
- Weekly view
- Monthly view
- “To do” list
- Parameters

You can scroll through the dates by pressing the □ key.

According to the view you can read, create, modify or send an item.

Information in the directory and the diary may be shared with a computer using the Alcatel PC software package (see page 84).
Creating an appointment and programming an alarm

When you create an appointment ("Create" option), you can also activate an alarm. You can set the desired alarm activation time in accordance with your appointment time.

Creating a task

Scroll to the ➡ icon using the ➡ key, and confirm using the ok key. Select "Select type", then confirm once again using the ok key and enter the type of task to be performed ("to do" or call appointment), then enter the purpose.

This list can be arranged by deadline or by priority. To do this, scroll to the ➡ icon using the ➡ key, then confirm using the ok key.

You can set an alarm for a task for which you have set a due date. This alarm will sound on the chosen day at the time that you entered.

Configure the diary

Scroll to the ➡ icon using the ➡ key, to access the following options:

Alarm
- Set a default time for the alarm to sound before the scheduled appointment.

Diary
- Program the start time for your day, your first day of the week and your first week of the year.

"To do"
- Arrange your tasks in order of priority or by date due.
- Delete all tasks or diary items or only those items that have expired.

More about your diary

Graphic view

### Daily view

- A single appointment recorded.
- Two or more appointments recorded during this time slot.
- Week number.
- An appointment was recorded prior to this time slot.
- An appointment was recorded after this time slot.
- The current day flashes.
- No appointments recorded.
If converting between international currencies, both currencies must be selected. You must also enter the appropriate exchange rate. An exchange rate value is pre-set for each currency. You can change this value by selecting “Set up”.

From the main screen, enter the amount in euros to be converted into the programmed currency, then press the OK key and select “Converter”.

9.4 Calculator

Enter a number and confirm with the OK key, then select the type of operation to be performed using the △ key and confirm again.

Enter the second number and press OK.

Select the “=” sign to display the result.

To return to the main screen, press the C key (long keypress).

9.5 Clock

You can display two clocks (local and remote) at the same time.

To program a local clock, you can first choose to activate automatic transition to daylight saving time; then to manage time zones by selecting a city on the world map using the navigation key. If you use two clocks, you have the option of selecting and then renaming a city for the local clock from the world map. You can then repeat the same operation for the remote clock.

The currency converter uses the final euro conversion rates set on 31/12/1998, which are used in accordance with official conversion rules.
9.8 Infrared
Your phone's infrared feature allows you to exchange contacts and diary data via an infrared link.

Sending data
To send data, select the directory file, then select the "Data transfer" option. It is not necessary to activate the infrared feature before sending.

Receiving data
To receive data, you must activate the infrared feature. A message will advise you of the arrival of data; you then save the data by pressing the OK key or reject it using the C key.

Once you have selected the option, the icon appears at the bottom of your screen; the connection is interrupted if there is an incoming call. You can receive up to 3 calling cards or appointments at the same time.

9.9 Programmed alarm
You can view all the alarms that you have programmed. After activation of the alarm, the icon appears on the main screen only if the alarm clock or timer have been programmed.
10 Events

To access Events from the main screen, select the events icon from the menu.

You have access to all events that occurred on your telephone during your absence, and which you have not yet consulted.

- **Unanswered calls**: Display the numbers of the people who tried to reach you in your absence (See page 20).
- **Messages (“Msg. Received”)**: allows you to access the messages that you have received (See page 28).
- **Voice Mail**: allows you to access the voice messages that you have received (See page 17).
- **WAP alerts**: view information sent over WAP.

11 WAP/GPRS services

11.1 Access WAP services

WAP (Wireless Application Protocol) is a service that allows you to access the mobile Internet. Thanks to WAP, you can obtain information such as: weather conditions, stock market information, traffic information, etc.

The “Homepage” option launches the WAP browser on the homepage of the default profile if it has been configured.

The “Bookmarks” option allows you to access the list of your favourite sites.

The “Profiles” option allows you to program the connection parameters for your WAP services access provider. In most cases, the connection parameters for your browser will have already been filled in.

The “Enter address” option allows you to directly access the WAP page for which you enter the URL address.

The “Push Mode” option allows you to set the different Push modes.

---

(1) Depending on your phone model.
(1) Depending on your model.
(2) Contact your network operator to check service availability depending on your model.
(3) Contact your network operator to check service availability.
11.2 Available options
You can access options in two different ways. You can either select the \( \text{Options} \) icon and then press \( \text{OK} \), or confirm “Options” when you consult a page.

- **Launch**
  - Launch WAP even if no profile has been selected.
- **Activate**
  - Program a default profile and return to the profile list.
- **Create**
  - Create a new profile.
- **Modify**
  - Modify the parameters for a profile \(^{2}\).
- **Delete**
  - Delete a profile that you have created \(^{2}\).
- **Back**
  - Return to the previous screen.
- **Exit**
  - Return to the main screen.

While creating or modifying a profile, you can choose the transmission mode: GPRS/GSM, GPRS, or GSM. If you select the GPRS/GSM transmission mode, GSM mode is activated if GPRS mode is not available.

To create a new profile, you are required to replace the following parameters \(^{1}\):
- Profile name
- Homepage
- IP address
- Security
- Bearer choice (GPRS/GSM, GPRS, GSM)
- Push parameters
- Validate

If you have selected the GPRS transmission mode, you must fill in the following parameters:
- Authentication \(^{1}\) (user name and password)
- APN \(^{2}\)

11.3 Programming your access \(^{1}\)
Select a profile from the profile list and access the following options by pressing the \( \text{OK} \) key.

- **Show URL**
  - Display the address of the site you are currently consulting \(^{1}\).
- **Go To URL**
  - Access the WAP site directly by entering the address.
- **Reload**
  - Refresh the current page.
- **Settings**
  - Customise your WAP access.
- **Exit**
  - End your WAP session and return to the main screen.

At any time during your navigation, a long keypress on the \( \text{C} \) key allows you to exit the WAP mode.

\(^{1}\) Depending on your phone model.

\(^{2}\) Enter the information supplied by your access provider.

\(^{3}\) Depending on type of profile.
11.5 GPRS function

Your mobile phone has an efficient high-speed built-in modem based on GPRS technology. With this modem you will surf faster on the WAP and send your MMS more easily.

If you wish to activate the GPRS function of your mobile telephone, you are advised to do the following:

1. Contact your operator to subscribe to the appropriate service, request the technical parameters required and ask your operator to check that your mobile telephone has been set correctly.

2. If you have any problems, you can contact the Alcatel Customer Care service.

Internet Assistance: www.alcatel.com
Alcatel hotline: see the “Alcatel Services” leaflet (calls charged at applicable local rates in your country)

If you selected the GSM transmission mode, you must fill in the following parameters:
- GSM user name
- Password
- Telephone number
- Access type
- Transmission speed

If you selected the GPRS/GSM transmission mode, you must fill in both the GPRS and GSM parameters.

11.4 Direct access/profile access

By selecting Customisation/Settings/WAP/GPRS, you can access the menu that will allow you to change the launch parameters for your WAP service.

• Direct access: when you launch WAP from the main screen, you go directly to the WAP homepage specified by the default profile.

• Profile access: when you launch WAP from the main screen, you will see the following screen:

If you selected the GSM transmission mode, you must fill in the following parameters:
- GSM user name
- Password
- Telephone number
- Access type
- Transmission speed

If you selected the GPRS/GSM transmission mode, you must fill in both the GPRS and GSM parameters.

[2] Contact your network operator to check service availability.
12 Media Album

12.1 Album menu
To access the Album from the main screen, press the navigation key to the left or to the right. The Album is a function that groups together all visual and sound items in your telephone, regardless of whether they are embedded, downloaded, recorded or composed.

This function comprises two menus:
- the images album, containing images, icons, photos etc., and
- the sounds album, containing sounds and melodies.

12.2 My images
You can select an image or a photo and use it as the main screen, the ON/OFF screen. You may change it, send it by MMS or assign it to a contact in the directory using the “Assign image” option (cf. page 25).

The Images album is made up of the following folders:
- **General**: list of all images (built-in or created) from all album folders.
- **Photos**: contains photos from the camera.
- **Images**: contains all images not belonging in one of the other folders.
- **Icons**: contains EMS, stamps...
- **Frames** (1): contains frames for enhancing your images.

12.3 My Sounds
You can choose a sound for the ON/OFF screen, for an incoming call, for a message alert or for an alarm (see page 41).

The Sounds album comprises the following folders (1):
- **General** (contains all sound items (built-in or created) from all album folders).
- **Melodies**.
- **Crazy sounds**.
- **Recorded sounds** (only contains recordings made with the “Record” function and the “Memo=melo” function).
- **Composed sounds** (only contains compositions made using “Compose”).

You can search any Images or Sounds file by pressing the key bearing the first character of the filename.

12.4 Managing sounds and images
In certain cases, the following options are displayed:

(1) Folder names cannot be modified. However, in certain cases, you can modify, delete and add items included in these folders.
13 Camera (One Touch 735 only) ........................................

Your camera is equipped with a camera for capturing a landscape, friends, family etc. You can record them in your “Media album”. You can also use one of your photos to:
- customise the main screen (see page 43),
- customise the ON/OFF screen (see page 45),
- assign it to a contact in your directory (see page 78),
- send it to your friends in a multimedia message (MMS) to a mobile or an e-mail address (see page 35).

To access this function from the main screen, press OK, then using the navigation key select “Camera” or press the right soft key directly. You then go straight to the photo shot screen.

13.1 Taking a photo

Your phone must be switched on to take a photo. The screen acts as viewfinder. Position the object or landscape in the viewfinder and press OK or the games action key . The viewfinder is situated on the back of the phone. Please do not touch it. To the left of the viewfinder there is a mirror to make sure you are well placed in order to take a photo of yourself.

Taking a photo with sound

When taking a photo, you can add a sound or a voice memo to it. To do so, keep your finger pressed down on the OK or X key when taking the photo. A screen will ask you to record your sound. If you release your finger, the recording will stop. Press C to return to the photo shot screen.

View
- View image (a waiting screen is displayed if the image is not visible within 1 second).

Listen to
- Listen to sound.

Send
- Send sounds or images.

Delete
- Delete the image or sound selected. Does not apply for built-in images.

Main screen
- Set up the image on the main screen.

Ring tones
- Choose a melody for an incoming call ringtones.

Modify
- Modify sounds or images.

Rename
- Rename sounds or images.

Classify
- Classify images (except for frames) or sounds (except for composed melodies) in the order you wish. They will be put in alphabetical order.

Create folder
- Create folders grouping together a series of images or sounds (for example: “Holidays” or “Birthday”).

Delete folder
- Delete a folder that you no longer wish to keep.

Rename folder
- Rename a folder that you have created.

Empty folder
- Empty the contents of a folder.

Back
- Return to the previous screen.

Exit
- Return to the main screen.

12.5 Formats and compatibility

List of audio and image formats compatible with your telephone:
- Audio: AMR, Midi, iMelody
- Image: JPEG (2), GIF, PNG, BMP

(1) Only applies to composed sounds.
(2) The telephone uses the “Independent Jpeg Group” code.

BH4_UM_GB_14-05-03  14/05/03  17:41  Page 71

Get user manuals: See SafeManuals.com
Access the settings from the MENU: From the photo shot screen, press the right soft key to access the following options:

13.2.1 Image size
This option gives you a choice of various sizes: L: (128x128 pixels), CIF (352x288), Panoramic (352x128), M (64x64), S (32x32), XS (16x16). The key allows you to successively change these sizes.

The larger the photo, the more memory it takes up in your telephone. Warning, photos in CIF and Panoramic formats will be reduced for optimum viewing on your telephone screen. Send them to a PC to see them in full resolution.

13.2.2 Capture mode
Select “Capture mode” in the options list or access directly by pressing the key and then choose one of the following modes:

- Single: a single photo; this is the default mode.
- Animation x 4: in this mode, you can take 4 consecutive photos like a small video clip. The number at the top right of the screen shows you which photo you are on: 1/4, 2/4, ..., 4/4. Aim at your first object, press , and wait a few seconds; when 2/4 appears you may take the second photo. Aim at your second object, press and so on... When you have taken the 4th photo, the animation will start automatically.
- Mosaic: in this mode, you will get an image made up of 4 thumbnails. To do this, proceed as for the animation; once the “Mosaic” has been selected (see above).

13.2.3 Frame
Choose a frame from the list offered and press ; the frame will be placed in your photo shot screen; if the image is to your liking, press to take the photo. You will also find this option in the “Modify” function (see page 78).
13.2.7 Colour
You can choose from 5 colour effects: Colour, Black and White, Sepia, Negative, Outlined. You can access this option directly from the taking photo screen by pressing the left soft key.

13.2.8 Access to album
This option enables you to access the “Album/Images” menu directly.

13.2.9 Folder by default
In this option you will find the list of image folders in the album such as “Photo”, “Image”, “Icon”, “Holidays”, etc. The “Photo” folder is selected by default. But if you wish to change, select another folder as your new default folder. Your photos will then be stored in the new folder automatically.

You can create your own folders using the “Album/Image” function (see page 69).

13.2.10 Other direct access options from the photo shot screen

- **Exposure**: adjust the contrast of your photo with the navigation key: to the left = darker, to the right = lighter.
- **Zoom**: activate the zoom with the up/down navigation key: up: zoom in, down: zoom out. If you keep the key pressed in, the zoom will be gradual (this option does not apply to CIF and Panoramic sizes).
- **Landscape mode**: take photos in “Portrait” or “Landscape” mode: you can rotate the photo with the navigation key before sending it (see page 77).

13.3 Options available after taking the photo

Once you have taken a photo or an animation, you can access the following options: to the left to “Record”, to the right for “Options”. Press the right soft key to access the following options:

- **Send**
  - Send your photo directly without saving it in the Album.

- **Save and send**
  - Save your photo automatically in the Album and send it by MMS.

- **Save**
  - Save your photo in the Album.

- **Delete**
  - Delete the photo you have just taken.

- **Modify**
  - Reduce size, add stamps, frames.

You can exit options or go back to the previous screen at any time by pressing OK or selecting the option “Back” or “Exit”.

14 Modifying images (1).................................

This option enables you to reduce image size, or to add stamps or frames. You have two possibilities for accessing images in order to modify them:

- Via the “Album” menu:
  - Choose an image, press OK and select “Modify”.

- Via the “Camera” menu (2):
  - After taking the photo, press the right soft key to access “Options” and select “Modify”.

From these two modes, you have access to the following 3 functions: reduce size, add stamps, add frames.

**Reduce size**:
- This function enables you to choose the format that fits your needs. You can use an image as a decorative stamp or obtain a minimum file size (e.g., send by MMS). This function is not valid if one of the sides of the image is less than 32 pixels. After selecting “Reduce”, press OK. The following screens will be displayed:

![Reduced image examples]

(1) Depending on your phone model
(2) One Touch 735 only
15 Games

15.1 Games menu

To access the "Games" menu, make a long press on the Games access key or press the OK key from the main screen and select the "Games" option.

You can choose from the following options:

• xxx (1) Go to the last game downloaded (2).
• yyy (2) Go to the game included in your telephone when you bought it (an asterisk * is placed just before the name of this game).
• Catalogue (3) Go to the catalogue of new downloadable games (2). Please refer to the information on charges for downloadable games (3).
• News Consult the latest games news.
• Instructions Information on the downloadable games service.
• Settings Configure the parameters for all games (your pseudo, sound settings and backlighting).

(1) xxx: Name of the last game downloaded. As long as no games have been downloaded the option will not be displayed. This option is also linked to your SIM card.
(2) The number and type of game already installed in your telephone vary according to the model.
(3) Available depending on your operator or country.

Stamps: this function enables you to illustrate your photos in a fun way. It applies to images between 32 and 128 pixels in size on both sides. From the "Add stamp" option, press OK. The following screens will be displayed:

Use the navigation key to choose a stamp.

The stamp will be placed in the centre of the screen.

Each keypress on the navigation key will move the stamp. Long keypress to move more quickly.

If your photo does not come within the limitations of the required format, you may possibly reduce the size in order to add a stamp or frame.

Frames: this function enables you to frame your photos. The frame format is 128x128 pixels. Images to be framed must be less than this format.

If your photo does not come within the limitations of the required format, you may possibly reduce the size in order to add a stamp or frame.
15.2 Navigation

In the games and the catalogue, the keys are used in the following fashion: up, down, left, right, OK.

For your comfort, you are advised to hold the telephone in the horizontal position and use the navigation key and the games action key.

15.3 Downloading a game

Select the "Catalogue" option in the "Games" menu. You will be requested to register the first time by sending an SMS (normal price of an SMS). Then, when you connect the next time to "Games", the "Catalogue" will contain the list of the latest downloadable games. Select the one you want and then choose the "Do you want to download" option. When the game has been downloaded it will be launched automatically and appear in the "Games" menu.

Warning: after the first download, each time you download a new game it will delete and replace the previous one. To get it back, choose the "Catalogue" option and select the game you want.

For some actions you may have to send an SMS (to access the catalogue, to send your High Score...).

(1) The availability of this service depends on your operator or country.
Making the most of your mobile

16 Making the most of your mobile.................

16.1 "My One Touch" services by Alcatel

On the "My One Touch" Website you will find all the services available to make the most of your mobile telephone.

Indeed, on "My One Touch" you can put your photos online, share them with your friends, rework them or transfer them...

In certain countries, "My One Touch" enables you to completely customise your mobile telephone: polyphonic ringtones, sound effects, animations, background screens, ...

Go to www.my-onetouch.com or simply choose the "My One Touch" option in your mobile telephone. Access this by selecting "Services" or "Customise/Ringtones" or "Images/Download" from the main menu.

16.2 Alcatel PC software package

Depending on your model, your packaging box will contain the PC software package. Otherwise, you can download it for free from the "My One Touch" Website. Your software package includes:

- Multimedia Studio: customise your mobile phone with sounds, melodies, images and animations (get on your PC the photos taken with your mobile phone (One Touch 735 only)).
- Intellisync software: synchronise your mobile phone with Lotus Notes, Microsoft Outlook Express and Microsoft Outlook.
- Data Connection Wizard: use your mobile phone to connect your PC to the internet.
### Supported Operating Systems
- Windows 98 Second Edition with DirectX 8.0 or later
- Windows Me
- Windows 2000 with Service Pack 3 (SP3) or later
- Windows XP with Service Pack 1 (SP1) or later

### Minimum system requirements
- 300 MHz processor
- 256 MBytes of RAM
- Super VGA display with 65000 colors

### Compatible software for synchronisation (Intellisync)
- MS Outlook 97 / 98 / 2000 / 2002
- Outlook Express 5.0 / 6.0
- Lotus Notes 4.6 / 5.0 / 6.0
- Lotus Organiser 5.0

### Instructions
1. Click the “Download” link to start the download
2. Do one of the following:
   - To start the installation immediately, click “Open” or “Run” this program from its current location.
   - To copy the download to your computer for installation at a later time, click “Save” or “Save this program to disk”.

Telephone warranty

Congratulations on choosing this mobile phone - we hope that you will be totally satisfied with it.

Notwithstanding any other applicable statutory warranties, this mobile phone is guaranteed against any manufacturing defect for a period of ONE (1) year from the date of purchase shown on your invoice. Nevertheless if the statutory warranty in force in your country exceeds ONE (1) year, the statutory warranty is not affected by the manufacturer’s warranty.

The present warranty terms also apply to the battery and accessories but for a period of SIX (6) months from the date of purchase shown on your invoice.

Under the terms of this warranty, you must inform your phone dealer or any maintenance centre approved by Alcatel (see list of maintenance centres at our web site www.alcatel.com) without delay of any defects and present the invoice given to you at the time of purchase. The phone dealer or the maintenance centre will decide, as appropriate, to replace or repair all or part of the telephone or the accessory found to be defective. This warranty covers parts and labour but excludes all other costs. Repair or replacement may be carried out using reconditioned products offering features equivalent to new products.

Any operations under this warranty, especially repair, modification or replacement of products, will be covered by a warranty of three months, unless other statutory provisions apply.

This warranty shall not apply to damage or defects to your telephone and/or accessory caused by:

1) Non-compliance with instructions for use or installation.
2) Non-compliance with technical and safety standards in force in the area where the phone is used.
3) Improper maintenance of power sources and of overall electrical facilities,
4) Accidents or the consequences of theft (of the vehicle), acts of vandalism, lightning, fire, humidity, infiltration of liquids, atmospheric influences,
5) Using the phone in conjunction with or connected to hardware not provided nor recommended by Alcatel, without Alcatel’s explicit consent.
6) Any service, modification or repair by persons not authorised by the manufacturer, the phone dealer or an approved maintenance centre,
7) Use for a purpose other than that for which the products were intended,
8) Normal wear,
9) Deterioration caused by external causes (e.g.: RF interference produced by other equipment, fluctuations in mains voltage and/or voltages on telephone lines, etc.).
10) Modifications made, even if unavoidable, due to changes in regulations and/or changes in network parameters,
11) Connection problems resulting from unsatisfactory radio transmission or caused by the absence of radio-relay coverage.

Telephones or accessories from which markings and/or serial numbers have been removed or modified, as well as telephones from which the labels are missing or damaged are excluded from this warranty.

The above provisions constitute the only claims, which can be made against the manufacturer and dealer on the grounds of equipment defects, this warranty excludes any other explicit or implied warranty except the statutory warranty in force in the user’s country.
19 Accessories (1).................................

The latest generation of Alcatel GSM mobile phones offers a built-in hands-free feature that allows you to use the telephone from a distance, placed on a table for example. For those who prefer to keep their conversations somewhat confidential, an earpiece is also available known as the headset.

Only use your telephone with ALCATEL batteries, chargers and accessories compatible with your model.

Depending on availability
20 Troubleshooting

Before contacting the after-sales service, we advise you to perform the following checks:

My mobile phone does not switch on
- Press C until the screen comes on
- Check the battery charge level
- Remove the battery and re-insert it, then turn the phone back on

My phone does not respond since several minutes
- Press the C key

My screen is difficult to read
- Check the contrast
- Activate the backlighting
- Use your mobile phone in accordance with the recommended conditions of use

My mobile phone's backlighting will not turn off
- Check that your keypad is locked when you are not using your mobile phone
- Check the battery charge level
- Make sure the backlighting is not permanently activated

The vibrator vibrates even when there is no incoming call
- A slight vibration may occur after a shock or sharp tap on the back of the telephone.

My mobile phone does not charge properly
- Make sure that your battery is not completely discharged; the battery charge indicator can take several minutes and may be accompanied by a quiet whistling sound.
- Make sure charging is carried out under normal conditions (-10°C +55°C)
- Make sure you are using an ALCATEL battery and charger
- When abroad, check that the electrical current is compatible

My mobile phone does not connect to a network
- Try connecting in another location
- Verify the network coverage with your operator
- Check with your operator that your SIM card is valid
- Try selecting the available network(s) manually (see page 50)
- Try connecting at a later time if the network is overloaded

SIM card error
- Make sure the SIM card was correctly inserted (see page 13)
- Verify with your operator that your SIM card is 3V compatible; the old 5V SIM cards cannot be used
- Make sure the chip on your SIM card is not damaged or scratched

Unable to make outgoing calls
- Make sure you have dialed a valid number and press the 1 key
- For international calls, check the country and area codes
- Make sure your mobile phone is connected to a network, and that the network is not overloaded or unavailable
- Check your subscription with your operator (credit, SIM card valid, etc.)
- Make sure you have not barred outgoing calls (see page 48)
Unable to receive incoming calls
• Make sure your mobile phone is switched on and connected to a network (check for overloaded or unavailable network)
• Check your subscription with your operator (credit, SIM card valid, etc.)
• Make sure you have not forwarded incoming calls (see page 49)
• Make sure that you have not barred certain calls

I can’t access my voice mail
• Make sure your operator’s voice mail number is correctly entered in “My numbers”
• Try later if the network is busy

I am unable to send nor to receive messages (SMS, MMS, Vox MMS)
• Check your phone memory available as it might be full
• Contact your network operator to check service availability
• Verify the server centre number or your MMS profile with your operator
• The server centre may be saturated; try again later
• The person you are calling may not have a phone compatible with your sending mode (EMS standard is required for sending pictures, sounds, etc.)

The icon is displayed on my standby screen
• You have saved too many short messages on your SIM card; delete some of them or archive them in the product memory

The << - >> icon is displayed
• You are outside of the network coverage area

I have already entered 3 incorrect PIN codes
• Contact your network operator to obtain the PUK code (Personal Unblocking Key)

The game I have downloaded is no longer displayed
• Check that the SIM card is the one you used when downloading the game
